

ABSTRACT OF THE DISCLOSURE

5 WEB ACCESSIBILITY SERVICE APPARATUS AND METHOD

A web accessibility service apparatus and method is provided. The web accessibility service apparatus and method provides accessibility tools to disabled users on a per-use basis. The provider of the accessibility tool is paid for each use of the accessibility tool to access content on the data network. The revenue may be obtained from content suppliers as consideration to the accessibility tool provider for providing another customer that otherwise may not have had access to their content. In this way, the accessibility tool is provided to the user at no cost, yet the provider of the accessibility tool is compensated for each use of their accessibility tool.
